Corning® Repeater and Syringe Tips

CORNING

Corning Repeater

The Corning Repeater is suitable to dispense volatile, dense, viscous, or foaming liquids, and for all applications where long dosing series are required. It works with 8 syringe tip sizes to dispense doses from 1 µL up to 5 mL. The lightweight construction, ergonomically shaped handle with a finger hook allows for single-handed volume setting, fast syringe tip filling, and convenient serial dispensing. The Repeater's precise stepping mechanism ensures repeatability of all dispensed doses, and the positive displacement allows for contamination-free operation.

Each device is tested for functionality and precision according to EN ISO 8655 and is supplied with an individual QC certificate.

Features

- Easy volume setting: Volume selection chart conveniently located on the device
- Fast and precise multiple dispensing: Up to 48 pipetting doses without refilling the tip syringe
- Wide range of polypropylene syringe tips: 8 different sizes, sterile and non-sterile versions available
- Positive displacement syringe tips: Dedicated to work with high density liquids or vapor pressure such as glycerol or ethanol
- Maintenance-free

Corning Repeater Starter Pack
