

Product Information

RPMI 1640 Advanced, w/o L-Glutamine, with Non-Essential Amino Acids, with Sodium Pyruvate Cat. No. RPMI-ADV-500ML

General Information

RPMI 1640 Advanced is based on the classical media formulation supplemented with advanced nutrients. The additional nutrients enable a 50-90% less Fetal Bovine Serum (FBS) supplementation required for the *in vitro* cell culture of mammalian cells.

RPMI 1640 Advanced supports cellular proliferation and maximum cell densities comparable, and in some cases superior, to the conventional basal formulation supplemented with 10% FBS.

Serum reduction improves the consistency, safety and reproducibility of experimental results by decreasing the variability caused due to undefined serum constituents and minimize the major concerns in the risk of contamination of FBS with harmful pathogens such as prions, viruses or Mycoplasma.

Appearance	Clear red orange solution	
CO ₂ concentration, optimum	4.5 %	
Storage and shelf life	Store at +2°C to +8°C protected from light. Once opened, store at 4° C and use within 6-8 weeks.	
Shipping conditions	Ambient	

Note: Increase safety of your cell culture even more through combining this medium with Gamma irradiated FBS (Cat-No: FBS-GI-12A).

Instructions for Use:

- Recommended concentrations of serum using RPMI 1640 Advanced ranges from 1-5 % Fetal Bovine Serum (e.g. FBS-GI-12A).
- No weaning procedures are necessary to reduce serum supplementation by at least 50%.
- The percentage of serum reduction may vary according to cell lines and should be adjusted to achieve optimal results.
- The conversion can be made by simply centrifuging the cells, decanting the supernatant, and resuspending them in the reduced-serum supplemented medium.
- If using antibiotics, we recommend reducing the amount in proportion to the amount of serum.

Product Information

RPMI 1640 Advanced, w/o L-Glutamine, with Non-Essential Amino Acids, with Sodium Pyruvate Cat. No. RPMI-ADV-500ML

Formulation

Components	Concentration mg/L	Components
Amino Acids:		Pyridoxal HCl
Glycine	10.00	Riboflavin
L-Alanine	8.90	Thiamine HCl
L-Arginine	200.00	Vitamin B12
L-Asparagine	50.00	
L-Aspartic acid	20.00	Inorganic Salts:
L-Cystine 2 HCl	65.00	Ca(NO ₃) ₂ ·4 H ₂ O
L-Glutamine	300.00	KCI
L-Glutamic acid	20.00	MgSO ₄
L-Histidine	15.00	NaCl
L-Hydroxy-L-Proline	20.00	NaHCO ₃
L-Isoleucine	50.00	NaH ₂ PO ₄
L-Leucine	50.00	ZnSO ₄ · 7 H ₂ O
L-Lysine HCl	40.00	
L-Methionine	15.00	Proteins:
L-Phenylalanine	15.00	BSA
L-Proline	20.00	Holo-Transferrir
L-Serine	30.00	Insulin (recombi
L-Threonine	20.00	
L-Tryptophan	5.00	Trace Elements:
L-Tyrosine 2 Na	29.00	Ammonium Met
L-Valine	20.00	Cupric Sulfate
		Manganous Sulf
Vitamins:		Sodium Selenite
p-Amino Benzoic Acid	1.00	
Ascorbic Acid phosphate	2.50	Other Compone
D-Biotin	0.20	D-Glucose
Choline chloride	3.00	Ethanolamine
D-Calcium Pantothenate	0.25	Glutathione (red
Folic Acid	1.00	Phenol Red Sod
myo-Inositol	35.00	Sodium Pyruvat
Nicotinamide	1.00	

Components	Concentration mg/L
Pyridoxal HCl	1.00
Riboflavin	0.20
Thiamine HCl	1.00
Vitamin B12	0.005
Inorganic Salts:	
$Ca(NO_3)_2 \cdot 4 H_2O$	100.00
KCI	400.00
MgSO ₄	48.84
NaCl	6000.00
NaHCO ₃	2000.00
NaH ₂ PO ₄	800.00
$ZnSO_4 \cdot 7 H_2O$	0.874
Proteins:	
BSA	400.00
Holo-Transferrin (human)	7.50
Insulin (recombinant, human)	10.00
Trace Elements:	
Ammonium Metavanadate	0.0003
Cupric Sulfate	0.00125
Manganous Sulfate	0.0000427
Sodium Selenite	0.005
Other Components:	
D-Glucose	2000.00
Ethanolamine	1.90
Glutathione (reduced)	1.00
Phenol Red Sodium Salt	5.00
Sodium Pyruvate	110.00

Precautions and Disclaimer
